RE: Universal Interiors LEED Project Participation

To Whom It May Concern,

This letter is to confirm Universal Interiors involvement in the trades of Drywall and Acoustical on the **302 E. Carson LEED Gold Building Retrofit**. Brad Souder with Universal Interiors was a significant part of our project team from March of 2009 to February 2010. Brad performed all of the Insulation and Drywall on the interior perimeter of the building helping us to attain our necessary Energy and Atmosphere points necessary to receive a LEED Gold rating. Brad also performed all of the Necessary Building Department Correction for Fire Ratings including, Stairwell Shaft Walls, Rated HVAC Shafts, Elevator Shafts, Smoke Rated Lobbies, New Main Lobby Ceilings, Insulation above Window Transoms and any other necessary work to make the project come to fruition.

Universal Interiors field crew is easy to work with and accommodating. His office and response time from Project Management enabled us to make last minute changes without schedule delay.

If you would like further recommendation please contact me at 626-239-3714.

Regards,
